Санкт-Петербургский национальный исследовательский университет информационных технологий, механики и оптики

УЧЕБНЫЙ ЦЕНТР ОБЩЕЙ ФИЗИКИ ФТФ

| Группа М3112 | К работе допущен |
|------------------------------------------|-------------------------------------------|
| Студент Баатарцогт Анужин | Работа выполнена <u>06/23/2020</u> |
| Преподаватель Мейлахс Александр Павлович | Отчет принят |

Рабочий протокол и отчет по лабораторной работе №3.13V

1. Цель работы.

Кольцо Гемгольца. Получение магнитного поля B в зависимосто от расстояния между кольцами и радиус кольца. Сравнение экпериментальных и лабораторных данных.

2. Задачи, решаемые при выполнении работы.

Получение данных от Комсола. Обработка данных. Вычисление магнитного поля. Построение графика магнитного поля. Сравнивание результаты.

3. Объект исследования.

Кольцо Гемгольца.

4. Метод экспериментального исследования.

Виртуальное COMSOL. MATLAB.

5. Измерительные приборы.

| № n/n | Наименование | Тип прибора | Используемый диапазон | Погрешность прибора |
|-------|---------------------------|-------------|--------------------------|------------------------|
| 1 | COMSOL Hemholtz Coil 3.13 | Виртуальный | | |

6. Рабочие формулы и исходные данные.

$$B = \mu_0 \left(\frac{4}{5}\right)^{3/2} \frac{IN}{R},$$

$$B_z = \frac{\mu_0 I R^2}{2} \left[\frac{1}{(z^2 + R^2)^{3/2}} + \frac{1}{[(z - a)^2 + R^2]^{3/2}} \right], \quad (11)$$

Неоднородность B_z в первом приближении характеризуется первой производной

$$\frac{dB_z}{dz} = \frac{3\mu_0 I R^2}{2} \left[\frac{-z}{(z^2 + R^2)^{5/2}} + \frac{-(z-a)}{[(z-a)^2 + R^2]^{5/2}} \right]. \tag{12}$$

При $z=\frac{a}{2}$ получаем $\frac{dB_z}{dz}=0$. Найдем вторую производную:

$$\frac{d^2B_z}{d^2z} = \frac{3\mu_0 I R^2}{2} \cdot K \tag{13}$$

$$K = \frac{5z^2}{(z^2 + R^2)^{7/2}} - \frac{1}{(z^2 + R^2)^{5/2}} + \frac{5(z - a)^2}{[(z - a)^2 + R^2]^{7/2}} - \frac{1}{[(z - a)^2 + R^2]^{5/2}}$$
(14)

7. Схема установки (перечень схем, Приложение 1)

| Distance Beetween Coils: | 0.1 | m | Distance Beetween Coils: | 0.4 | m |
|----------------------------------|-----|------------|----------------------------------|-----|---|
| Coil current: | 1 | А | Coil current: | 1 | Α |
| Radius Of Coil Down: | 0.4 | m | Radius Of Coil Down: | 0.1 | m |
| Radius Of Coil Up: | 0.4 | m | Radius Of Coil Up: | 0.1 | m |
| Magnetic field in Point (0,0,0) | • | | Magnetic field in Point (0,0,0): | | |
| 2.348 A/m | | 0.5414 A/m | | | |
| Distance Beetween Coils: | 0.5 | m | Distance Beetween Coils: | 0.5 | m |
| Coil current: | 1 | Α | Coil current: | 1 | Α |
| Radius Of Coil Down: | 0.5 | m | Radius Of Coil Down: | 0.4 | m |
| Radius Of Coil Up: | 0.5 | m | Radius Of Coil Up: | 0.6 | m |
| Magnetic field in Point (0,0,0): | | | Magnetic field in Point (0,0,0): | | |
| 1.357 A/m | | | 1.373 A/m | | |

8. Результат прямых измерений и их обработки (Таблицы примеров и их расчётов)

Данные о распределении потенциала по координатам точки. Всего 18 файлов получили.

Например:

% X Y Z 0 0 0 0.25 mf.Hx (A/m) mf.Hy (A/m) mf.Hz (A/m) 1.4520265799277348E-4 2.2167032099388715E-5 1.0926648961539707

9. Журнал измерений:

| № опыта | Distance Between Coils | Coil current | Radius Of Coil Down | Radius Of Coil Up |
|---------|------------------------------|--------------|------------------------|----------------------|
| 1 | 0.1 | 1 | 0.4 | 0.4 |
| 2 | 0.4 | 1 | 0.1 | 0.1 |
| 3 | 0.5 | 1 | 0.5 | 0.5 |
| 4 | 0.5 | 1 | 0.4 | 0.6 |

10. Расчёт результатов косвенных измерений: Python

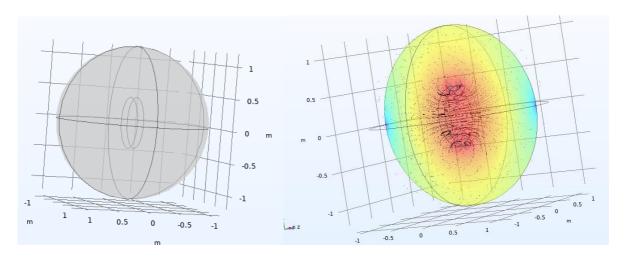

Код вычисления В и построения графа:

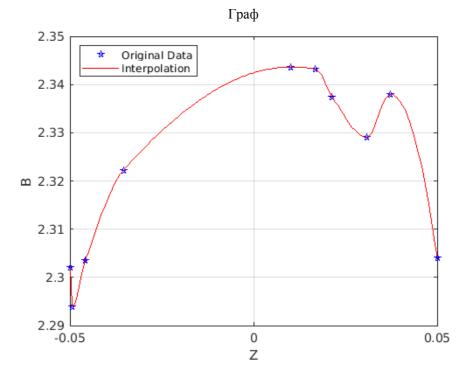

```
close all; clear all;
A=dlmread(['1.txt']);
Z = A(:, 3);
Bx = A(:, 4);
By =A(:, 5);
Bz = A(:, 6);
B = sqrt(Bx.^2 + By.^2 + Bz.^2);
new_table = [Z B]
out_sortrows(new_table,1)
z = out(:, 1);
b = out(:, 2);
figure(1)
z_interp = linspace(min(z), max(z),200);
b_interp = interp1(z, b, z_interp, 'cubic');
plot(z, b, 'bp')
hold on
plot(z interp, b interp, '-r')
hold off
grid
xlabel('Z')
ylabel('B')
legend('Original Data', 'Interpolation', 'Location', 'NW')
```

Данные будут онлайн google drive и вместе в rar файле для отчёта:

11. Сравнение полученного графа с графой из моделирований
